📍 Hyderabad, India

PROFESSIONAL SUMMARY

Computer Science (Data Science) student with hands-on experience building full-stack MERN applications and ML-powered tools. Shipped real-time collaborative systems, a paper trading platform with live market data, and a disease prediction model covering 150+ diseases — comfortable across the entire stack from React and Node.js to Python, XGBoost, and cloud analytics on BigQuery. Strong academic record (CGPA 8.87) with a consistent track record of taking projects from idea to deployment.

WORK EXPERIENCES

MERN Stack Intern | Internship

Feb 2026 - Apr 2026

On-site • Hyderabad, India

Suntek IT Solutions

- Completed a 10-week structured training program in JavaScript, Node.js, Express, and full-stack MERN development alongside DSA
- Shipped a full-stack blog application capstone with end-to-end deployment — Vercel (frontend), Render (backend), and MongoDB Atlas
- Spent the final month in independent project mode, delivering two production-grade MERN applications from scratch

Technologies / Skills Used : JavaScript, Node.js, Express, MongoDB, Vercel, Render, Tailwind CSS, React

Virtual Intern

May 2026 - Jun 2026

Remote • Remote

Google Cloud via EduSkills / AICTE

- Completed Google's Data Analytics learning path covering BigQuery, Looker Studio, and cloud-based data pipeline fundamentals
- Queried large datasets using SQL in BigQuery and built analytical dashboards in Looker Studio through hands-on labs
- Authored a 30-page internship report independently documenting BigQuery workflows, Looker Studio dashboards, and data analytics outcomes

Technologies / Skills Used : BigQuery, SQL, Looker Studio

PROJECTS

MarketForge — Paper Trading Simulator | Github Website

May 2026 - Jun 2026

Individual Project

- Built a full-stack paper trading platform tracking 30 stocks with real-time market data scraped from Yahoo Finance, enabling users to simulate trades and monitor live portfolio performance
- Implemented JWT cookie-based authentication with persistent sessions, portfolio tracking, and real-time P&L calculations across trades
- Designed a dark premium dashboard UI with Tailwind CSS, Zustand for global state management, and react-hook-form for trade inputs

Technologies / Tools Used : React, Node.js, Express, MongoDB, Zustand, Yahoo Finance API, Tailwind CSS

PROJECTS

AI Health Prediction Application |  Github  Website

Oct 2025 - Dec 2025

Lead Developer

- Trained a symptom-to-disease classification model covering 150+ diseases using XGBoost and Gradient Boosting, served via a FastAPI backend
- Built an OCR pipeline to automatically extract prescribed medicines from uploaded prescription images, eliminating manual data entry
- Designed a medication reminder workflow to help users track dosage schedules derived from OCR-extracted prescriptions

Technologies / Tools Used : Python, FastAPI, XGBoost, Gradient Boosting, OCR

Kanvora — Collaborative Project Board |  Github  Website

Apr 2026 - Jun 2026

Lead Developer · Team of 5

- Built a Trello-style project management app with real-time collaboration via **Socket.IO** — board changes sync instantly across all connected clients
- Implemented drag-and-drop card and column reordering with **react-beautiful-dnd**, including race condition handling for concurrent edits
- Role-based access control (USER / AUTHOR / ADMIN) with protected routes and a settings panel for board management

Technologies / Tools Used : React, Node.js, Express, MongoDB, Socket.IO, react-beautiful-dnd

SKILLS

Databases :	MongoDB, MySQL, BigQuery, Supabase
Frameworks & Libraries :	React, Node.js, Express, FastAPI, Zustand, react-beautiful-dnd, Tailwind CSS
Programming Languages :	JavaScript, Python, C, C++, Java, SQL
Tools & Platforms :	Git, Postman, Excel, Godot, GitHub, GitHub Actions, Linux, GitLab

EDUCATIONS

Anurag University Hyderabad	2024 - 2028
B.Tech CSE (Data Science)	CGPA : 8.87
Sri Chaitanya Jr Kalasala Hyderabad	2024
Intermediate (12th)	CGPA : 93.3%
Sri Chaitanya Techno School Hyderabad	2022
Secondary School (10th)	CGPA : 9.7
